Band 3
Forschungsprofile

Captions of the cover figures

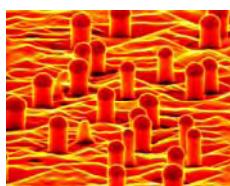

Single crystal manganese oxide multipods. The synthesis of hexapods (one example shown) is based on thermal decomposition of Mn(oleate)₂. They are homogeneous in size. The single pods are smaller than 100nm.

Ni crystallites in porous glass taken by SEM. The Ni crystallites are yellow, the glass structure is blue. *Details: Inst. für Technische Chemie und Molekulare Chemie, Interdiszipl. Zentrum für Materialwissenschaften*

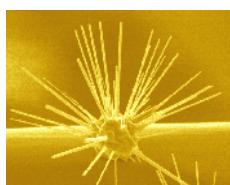

Polystyrene nanotubes (molecular weight 800000 g/mol) fabricated by wetting of porous templates. The nanotubes have wall thicknesses of 20 nm to 40 nm and lengths up to 100 µm.

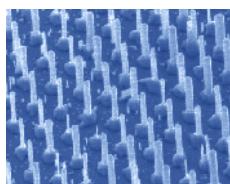

Silicon nanowires grown by molecular beam epitaxy. The growth is initiated by gold droplets (cf. caps). Typical diameters of the silicon nanowires are between 70 nm and 200 nm.

Magnetic cobalt nanodots on a reconstructed gold surface. The magnetic nanodots have a lateral separation of 7.4 nm, are 1 atom high and 4 nm in diameter. The hypothetical magnetic storage density is 10 Tbits / square inch.

ZnO nanowires grown from a gold-film-coated particle by vapor deposition. The coating of nanowires increases the surface area of the particle. The nanowires are 40 nm in diameter and 5 µm in length.

Arrays of vertically aligned and hexagonally arranged ZnO nanowires. The growth is based on nanodot gold templates (100 nm). The ZnO wire diameters can be varied from 30 nm to 250 nm.

Flower-like ZnO nanowire structures grown radially from a µm-wide and mm-long core wire. They could be applicable for random lasing. Each of the nanowires has a diameter of ~30 nm and a length of 10 µm.

Curriculum Vitæ

Hans-Peter Abicht

(Prof. Dr.)

Professor of Solid State Chemistry/Materials Science

Martin Luther University Halle-Wittenberg
Department of Chemistry
06099 Halle (Saale)

Tel.: 0345-5525622

Fax: 0345-5527028

E-Mail: hans-peter.abicht@chemie.uni-halle.de

<http://www2.chemie.uni-halle.de/anorg/ak/abicht/index.html>

1962-1967	Studies of chemistry at Martin Luther University Halle-Wittenberg, Germany
1967	Diploma Thesis in organo-phosphorus chemistry under the direction of Kurt Issleib "Synthesis and reactivity of Lithium-bis(diphenylphosphino)-methanide"
1966-1973	Scientific co-worker at the Institute of Inorganic Chemistry at Martin Luther University
1971	Ph.D. Thesis in the field of carbon-metallated phosphines
1973-1987	Senior assistant at the University Halle
1980-1981	Postdoc at the Iowa State University in Ames, USA, with Professor John Verkade
1982	Habilitation in organometallic chemistry "o-Lithiobenzylidorganophosphines as building blocks" at the Martin Luther University
1983	Scientific stay at the Max Planck Institute of Solid State Research in Stuttgart, Germany, with Professor H. G. von Schnering
1987	Appointment to an Apl. Hochschuldozent of the University Halle
1987	Start with the organization of a materials science oriented solid-state research group at the Department of Chemistry in cooperation with the Department of Physics
1989	Award of the "Research Prize" of the Martin Luther University, Halle
1990-1993	Deputy director of the Department of Chemistry
since 1994	Professor at the Martin Luther University Halle-Wittenberg, Germany
since 1995	Member of the directorate of the Materials Research Center of Martin Luther University Halle-Wittenberg
since 1996	Member of research center (SFB 418)

Forschungsthemen

Synthesis and characterization of pre-ceramic powders by various methods; nano powders; microwave assisted synthesis; surface modification of powders; synthesis, characterization and application of core-shell structures; anion substitution (O/N exchange) of perovskites (BaTiO_3);microwave sintering of ceramics.

1966-1971	Study of chemistry, University of Tübingen and University of Freiburg, Germany
1971	Diploma thesis in Physical Chemistry, University of Freiburg
1976	Dr. rer. nat. in Physical Chemistry, University of Freiburg
1980-81	Post-Doc (Research grant of the Deutsche Forschungsgemeinschaft) at the Massachusetts Institute of Technology, Cambridge, Mass., USA
1983	Habilitation in Physical Chemistry, University of Freiburg
1976 – 83	Senior Research Assistant (Habilitand), University of Freiburg
1983-88	Privatdozent, University of Freiburg
1988	Professor of Physical Chemistry, University of Kaiserslautern
1996-97	Group leader research group "Liquid-crystalline systems" of the Max Planck Society at the Institute of Physical Chemistry, Martin Luther University Halle-Wittenberg
1997	Professor of Physical Chemistry, Martin Luther University Halle-Wittenberg
1998	Director of Institute of Physical Chemistry, Martin Luther University Halle-Wittenberg
2003	Dean of Department of Chemistry, Martin Luther University Halle-Wittenberg
2003	Annual Prize of the European Society of Applied Physical Chemistry
2004	Member of the Senate of the Martin Luther University Halle-Wittenberg

Forschungsthemen

Self-assembly of amphiphilic molecules: micelles, nanofibers and nanoparticles, lyotropic phases, monomolecular films at interfaces, biological model membranes.

Structure and dynamics of amphiphilic molecules: x-ray scattering on lyotropic systems, thermodynamic investigations with calorimetric methods (DSC, ITC), spectroscopic investigations using NMR-, FT-IR-, Raman-spectroscopy, FT-IR-reflection spectroscopy at interfaces, kinetics of phase transitions in lyotropic systems (stopped-flow-technique, pressure jump methods with UV-Vis, IR, light scattering and NMR detection).

Curriculum Vitæ

Manfred Dubiel

(PD Dr.)

Lecturer of Experimental Physics

Department of Physics
Martin Luther University of Halle-Wittenberg
D-06108 Halle (Saale)

Tel.: 0345-5525524

Fax: 0345-5527159

E-Mail: manfred.dubiel@physik.uni-halle.de

www.physik.uni-halle.de/Fachgruppen/Glas/mitarbeiter/Dubiel/dubiel.htm

1970-1974	Studies of Physics at Martin Luther University of Halle-Wittenberg, Germany
1974-1977	Ph.D. student at the Martin Luther University of Halle-Wittenberg
1977	Ph.D. Thesis in solid state physics "Aggregation of point defects in doped NaCl crystals"
1977-1987	Scientific assistant at the Department of Physics of Martin Luther University of Halle-Wittenberg
1987	Visiting scientist at the Institute of Solid State Physics and Electron Microscopy (IFE), Halle, of the Academy of Sciences, Berlin
1987	Dr. sc. nat. degree at Martin Luther University of Halle-Wittenberg (Thesis on the "Structure of fluorophosphates, fluoroaluminate and borosilicate glasses")
since 1987	Lecturer of Experimental Physics; activities in teaching and research work at the Department of Physics
1992	Acknowledgement of habilitation in Experimental Physics
since 1994	Research staff member of group of "Glass physics" at the Department of Physics
since 1995	Member of the commission "Physics and Chemistry of Glasses" of the "German Glass Society"
since 1996	Project leader and member of the Coordinated Science Project "Structure and dynamics of nanoscopic inhomogeneities in condensed matter" at Martin Luther University of Halle-Wittenberg (SFB 418)

Forschungsthemen

Atomic structure and properties of nanoparticles and glasses, conductivity and dynamics of ionic glasses, X-ray absorption spectroscopy, valence state of polyvalent ions, diffusion and redox processes in glasses

1991-1997	Studies of physics at Humboldt-University Berlin, Germany Diploma Thesis in physics "Extremely asymmetric x-ray geometries for the investigation of weakly distorted thin layers" at the HU Berlin
1997-2002	Ph.D. student at the HU Berlin
2002	Ph.D. in physics (summa cum laude), HU Berlin, Thesis title: "Diffuse x-ray scattering at self-organized semiconductor island structures"
09/2003-11/2003	Wissenschaftlicher Assistent (C1) at the Martin-Luther-University Halle-Wittenberg with Prof. Dr. H.-R. Höche
12/2003-10/2004	Postdoc at the National Institute of Standards and Technology, Gaithersburg (USA) in the framework of a DFG Forschungsstipendium
Since 11/2004	Wissenschaftlicher Assistent (C1) at the Martin-Luther-University Halle-Wittenberg with Prof. Dr. H.-R. Höche

Forschungsthemen

Self-organization at low-dimensional structures,
x-ray scattering techniques,
application of synchrotron radiation in materials research,
numerical finite element simulations on the quasi-static and dynamic behavior at the nanometer scale.

October 1977	Begin of the chemistry studies at the University of Karlsruhe (TH)
October 1979	Diploma in Chemistry - intermediate examination
October 1982	Diploma in Chemistry - main examination
	Diploma Thesis – and Doctoral Thesis in Inorganic Chemistry under the supervision of Prof. Dr. D. Fenske
April 1986	Ph.D. Thesis
February 1986 - November 1986	Research associate at the Max-Planck-Institut für Festkörperforschung in Stuttgart (Group of Prof. Dr. H. G. v. Schnering)
December 1986	Research associate at the Institut für Anorganische Chemie der J. W. Goethe-Universität Frankfurt (Group of Prof. Dr. D. Fenske)
Februaray 1990 - October 1993	Assistant Professor at the University of Karlsruhe
January 1991	Habilitation, Erteilung der Lehrbefugnis für das Fach "Anorganische Chemie"
October 1991 - February 1992	Teaching position at the University of Stuttgart-Hohenheim
April - September 1992	„Vertretung“ of a C3-Professur at the University of Freiburg
October 1993	Appointed to the grade of University Professor
from July 1994	C3-Professor for "Molecular and Structural Chemistry" at the University of Halle-Wittenberg

Forschungsthemen

Synthesis and structural characterization of clusters of elements of the main group, matallorganic chemistry with emphasis on supramolecular aspects (e.g. Organozincoxometallate), Coordinationpolymers (MOF's, metal-organic frameworks), X-Ray diffraction (single crystals and powder diffraction).

M. Prehm, S. Diele, M.K. Das, C. Tschierske

Correlated layer structures- A novel type of liquid crystalline phases with 2D-lattice

J. Am. Chem. Soc. **125**, 614-615 (2003)

X.-H. Cheng, M. Prehm, M. K. Das, J. Kain, U. Baumeister, S. Diele, D. Leine, A. Blume, C. Tschierske

Calamitic bolaamphiphiles with (Semi)perfluorinated lateral chains: Polyphilic block molecules with new liquid crystalline phase structures

J. Am. Chem. Soc. **125** 10977-10996 (2003)

B. Chen, X. Zeng, U. Baumeister, S. Diele, G. Ungar, C. Tschierske

Liquid crystals with novel complex superstructures

Angew. Chem. Int. Ed. **43**, 4540-4548 (2004)

C. Keith, R. A. Reddy, U. Baumeister, C. Tschierske

Banana-shaped liquid crystals with two oligosiloxane end-groups: Field-induced switching of supramolecular chirality

J. Am. Chem. Soc. **126** , 14312-14313 (2004)

B. Chen, X. Zeng, U. Baumeister, G. Ungar, C. Tschierske

Liquid crystals composed of pentagonal, square and trigonal columns

Science. **307**, 96-99 (2005)

Curriculum Vitæ

Joachim Ulrich

(Prof. Dr.)

Professor of Thermal Separation Processes

Department of Engineering
Martin Luther University Halle-Wittenberg
06099 Halle (Saale)

Tel.: 0345-5528400
Fax: 0345-5527358
E-Mail: joachim.ulrich@iw.uni-halle.de
<http://iw.uni-halle.de/tvt>

1971 – 1976	Studies of Chemical Engineering at TU Clausthal, Germany
1976 – 1981	Scientific assistant at RWTH Aachen, Germany
1981	PhD-Thesis in Chemical Engineering (with the degree: Dr.-Ingenieur) from RWTH Aachen, Germany
1981 – 1982	Postdoc research fellowship at Waseda University, Tokyo, Japan, granted by the Japan Society for the Promotion of Science (JSPS)
1982 – 1984	scientific assistant at the Institut für Verfahrenstechnik der RWTH Aachen;
1983	Visiting Professor for Chemical Engineering at the Tongji-University, Shanghai, PR China, supported by DAAD
1984 – 1999	Scientific staff member of the Department of Chemical Engineering of the faculty of Production Engineering at the University of Bremen, Germany
1990	Habilitation in Chemical Engineering (Privatdozent, teaching in Chemical Engineering) at the University of Bremen
1994	Visiting Professor at IPT, São Paulo, Brasil, supported by FAPESP and DAAD
1995 September	Außerplanmäßiger Professor (professorship) given by the Senator für Bildung, Wissenschaft, Kunst und Sport der Freien Hansestadt Bremen,
1994 - 1999	Member of research center DFG - SFB 372
since 1999 May	Full Professorship at the Martin Luther University Halle-Wittenberg,
since 2000	Chair of Thermal Separation Processes in Chemical Engineering
since 2001	Topic Editor of the Journal of Crystal Growth & Design
May-June 2005	Chairman of the Working Party on Crystallization of the European Federation of Chemical Engineering,
Since 2005	Visiting Professor at the University of Rouen, France, Member of Editorial Advisory Board of the Journal “Chemical Engineering & Technology”

Forschungsthemen

Industrial Crystallization, Melt and solution crystallization processes, Molecular Modelling in Crystallization, Process design, Emulsion Forming

Relevante Publikationen

|-------------|---|
| 1971 - 1976 | Physik-Studium an der Martin-Luther Universität Halle /Saale |
| 1975 – 1976 | Diplomarbeit am "Institut für Festkörperphysik und Elektronenmikroskopie“ der AdW in Halle |
| 1976 | Diplomprüfung |
| 1976 – 1991 | Wissenschaftlicher Mitarbeiter am "Institut für Festkörperphysik und Elektronenmikroskopie“ der AdW |
| 1984 – 1987 | Promotion am "Institut für Festkörperphysik und Elektronenmikroskopie“ in Halle / Saale |
| 1990-1991 | Gastaufenthalt am "Institut für Festkörperforschung“ der KFA in Jülich |
| 1991 – 1992 | PostDoc-Aufenthalt am Lawrence Berkeley Laboratorium in Berkeley / USA |
| ab 1992 | Wissenschaftlicher Mitarbeiter am MPI für Mikrostrukturphysik in Halle / Saale |
| 1997/98 | Gastaufenthalt an „Bell Laboratories“ in Murray Hill/USA |

Forschungsthemen

Festkörperphysik, Halbleiterphysik,
Transmissionselektronenmikroskopie,
Strukturanalyse kristalliner Materialien mittels der Hochauflösungsmikroskopie (Halbleiter, Silikate, Oxide),
Wachstum von Halbleiter-Heterostrukturen mittels MBE,
Punktdefektdiffusion in Halbleitern,
Strukturanalyse von Quanten-Strukturen in Halbleitermaterialien,
Strukturanalyse von Grenzflächen im Rahmen von Festkörperreaktionen,
Wachstum und Charakterisierung von SiGe-Nanodrähten.

Relevante Publikationen
